The interior spaces follow the same concept, creating double heights and spectacular cross views. This geometry extends to the facades, making the house, despite its generous surface of more than 300 m², integrate perfectly into its surroundings.

Distribution:

On the ground floor, you will find the day area, following the American concept. A cozy living room separated from the dining room by two heights, with a central fireplace that makes it a cozy space. The dining room, independent but communicable through sliding doors, joins the spacious kitchen, one of the highlights of the house. The kitchen has two areas, one for cooking and one for eating, both open to the porch, which in turn connects to the garden and the summer dining room, equipped with a large barbecue to enjoy memorable barbecues.

Of the 5 bedrooms, one is located on the ground floor, while the others occupy the upper floor. One of them is a suite with a semi-open bathroom, a modern design, and a private dressing room. In addition, the property includes a garage with capacity for several cars and various rooms, an exquisitely landscaped garden of 700 m² and an impressive swimming pool.
